

Senator Manchin Weekly Energy Report

April 16, 2018*

COAL

Spot prices (dollars/short ton) for thermal coal for the week ending April 13, 2018.

- \$61.45 in Central Appalachia (up \$0.35)
- \$45.05 in Northern Appalachia (No change)
- \$12.35 in Powder River Basin (Up 0.10)

For the week ending April 7, 2018, EIA's coal production estimates for the U.S. are:

- Approximately 14.3 million short tons (mmst). This estimate is about 2.9% lower than last week's estimate and 6.3% higher than the comparable week in 2017.
- East of the Mississippi River: 5.8 mmst
- West of the Mississippi River: 8.5 mmst
- National year-to-date coal production totaled 205.4 mmst, which is 2.5% lower than the year-to-date production in 2017.

MET COAL**

Average price: \$146.12 (February 2018).

WEST VIRGINIA ANNUAL PRODUCTION

2009	2016	2017
158 million short tons (peak)	80 million short tons	Projected at up to 88 million short tons (approx.)

NATURAL GAS

Weekly prices for report week (Wednesday, April 4 to Wednesday, April 11):

South Louisiana (Henry Hub)	Appalachia (Dominion South)
\$2.69/mmbtu (down \$0.08)	\$2.01/mmbtu (down \$0.56)

GASOLINE

Today's average retail price: \$2.74 per gallon

ELECTRICITY***

National Average	West Virginia Average
\$12.23 cents/kwh (down \$0.27)	\$11.05 cents/kwh (down \$0.24)

Note: The EIA expects total 2017 U.S. coal production to be 773 million short tons (MMst), 45 MMst higher than in 2016 and the largest year-over-year tonnage increase since 2001. Coal prices across the United States rose as well, especially for Central Appalachian coal. The increase was driven in part by high international demand for met coal. EIA expects total U.S. coal exports to reach 95 MMst in 2017, a 58% increase from 2016.
